

3 Days Group Camping Safari to Serengeti and Ngorongoro Crater

Serengeti the home to the greatest wildlife spectacle on earth – the great migration of wildebeest and zebra. The resident population of lion, cheetah, elephant, giraffe, and birds is also impressive. With an ecosystem termed to be one of the oldest on earth. The essential features of climate, vegetation and fauna have barely changed in the past million years. Early man himself made an appearance in Olduvai Gorge about two million years ago. Some patterns of life, death, adaptation and migration are as old as the hills themselves.

It is the migration for which Serengeti is perhaps most famous. Over a million wildebeest and about 200,000 zebras flow south from the northern hills to the southern plains for the short rains every October and November, and then swirl west and north after the long rains in April, May and June. So strong is the ancient instinct to move that no drought, gorge or crocodile infested river can hold them back.

To a day in Ngorongoro Crater one of Africa's most famous sites and is said to have the highest density of wildlife in Africa. Sometimes described as an 'eighth wonder of the world', the Crater has achieved world renown, attracting an ever-increasing number of visitors each year. You are guaranteed great wildlife viewing in a genuinely mind-blowing environment. There is nowhere else in Africa quite like Ngorongoro!

Day 1: Arusha to Serengeti National Park.

Early morning drive to Serengeti via Ngorongoro Crater. A drive through Karatu town into heartlands of the Ngorongoro Highlands. Arrive at Ngorongoro Main Gate
